

Certified Erosion and Sediment Control Lead (CESCL) Training

Do you need a Construction Stormwater General Permit from Ecology? If your project disturbs over an acre of land or is in a subdivision, you probably do. One of the requirements of this permit started last October all sites disturbing over an acre must have a Certified Erosion and Sediment Control Lead (CESCL). The CESCL is trained to inspect, install, and manage stormwater controls on your site. **Because Ecology requires the CESCL to be on-call or on-site at all times, most companies will need more than one employee trained as a CESCL.**

Designed for residential builders, the course explains the erosion process and how to apply and comply with the stormwater permit. The course also provides detailed instruction on how to develop a stormwater plan, select and maintain stormwater controls, and accurately sample stormwater. BIAW's CESCL certification class will give you the tools you need to comply with local and state stormwater requirements. This class also meets CESCL requirements for recertification.

Also Approved for:

- ▶ 16 Appraiser Classroom Continuing Education Hours
- ▶ Re-Certification Credit: Certified Graduate Associate (CGA), Builder (CGB), Remodelor (CGR) & Graduate Master Builder (GMB)

Register today. These classes will fill quickly.

WA-CESCL certification meets the requirements of the Oregon 1220-C construction general permit for qualified inspectors and the EPA permit requirements for qualified individual.

Must PRE-PAY Registration (price includes lunch):

- \$250 Members
- \$325 Non-Members

Make check payable and return to:
